WEGER HISTORY

Weger Motorlu Araçlar San. ve Tic A.Ş.

More than 70 years of Experience in the Automotive Industry!

Weger started its journey in Ankara in 1956 as a small business supplying spare parts for heavy vehicles. Our company, which has shown sales activities in Turkey over the years, started exports in 1990 and actual production in 1994. We continue production in our Çorlu factory, where we moved in 2017.

As Weger, we are a Turkish company that has accepted our quality worldwide. We produce OEM parts directly for original vehicle manufacturers. In addition, we directly export our products to 46 countries with our own brand "Weger".

In 2011, our company turned into a production facility with high-tech devices with its new investments.

25 new high-tech CNC lathes and 30 CNC machining centers have been added to the production line.

Our brake systems production line started operating in 2012. (Brake Disc, Brake Pad, Brake Drum, hub, Rotor etc.)

Today, our company, which is among the leaders of the Turkish automotive spare parts industry, continues to provide spare parts for the world's important heavy vehicle, commercial vehicle and passenger vehicle brands and models.
